

FORESTRY

Responsible and sustainable forest management has become one of the vital issues during the past decades. Inadequate and improper forest management practices are not only threatening the economic aspect of the forest, but it also has high negative impacts in environmental and social aspects. These issues as well as public awareness lead to demand for timber products which originated from a forest managed in responsible, sustainable, and free from illegal logging. Thus, manufacturers and suppliers of timber products who want to ensure that their wood source come from responsible and sustainable practice will need chain of custody certification scheme.

Many global chain of custody certification scheme for timber has been developed today. The commonly used forest management and chain of custody are *Forest Stewardship Council (FSC)* and *Programme for the Endorsement of Forest Certification Scheme (PEFC Chain of Custody)*. For Indonesia specifically, there is chain of custody and forest management standard called *Indonesian Forestry Certification Cooperation (IFCC)* which is endorsed by PEFC. In addition, *Indonesian Timber Legality Assurance System (SVLK – Sistem Verifikasi Legalitas Kayu)* is also EU Recognized certification scheme for Indonesia Timber product in order to access global wood and timber market. In the end, getting your business certified is very important for your business growth in the future as well as for the future availability of forestry product.

WHAT CAN WE ASSIST:

In Peterson Projects & Solutions, we can assist your business on sustainable forest management and wood product chain of custody certification preparation. We can assist your business whether on plantation, logging, Manufacturer, or Trader which wants to ensure that your timber and wood product is certified. Our consultancy comply with the FSC Principles and Guidelines, PEFC Council International Standard, IFCC Standard, as well as SVLK Guidelines.
