

CARBON

In the global fight climate change as well as to limit the temperature rise to 2 degrees, a reduction of global greenhouse gas (GHG) emissions plays crucial role. Following the EU Fuel Quality Directive (FQD), fuel suppliers in Europe are also obliged to reduce the greenhouse gas (GHG) emissions of transport fuels by six percent in 2020, compared to the baseline of 2010. An increasing number of companies and countries to contribute to this goal by reducing their emissions and become carbon neutral. Therefore, the standards are needed to achieve carbon neutral business operations or products as well as to provide the confidence in the accuracy of carbon footprint claims, and assurance to stakeholders and investors.

Carbon Neutral Verification (PAS 2060), Emission Verification (ISO 14064-1 and ISO 14064-2), Upstream Emission Reduction (UER), Plan Vivo, ISO 14001, ISO 50001 have developed acknowledged Chain of Custody standards for carbon emissions globally. The standards have own focus and project requirements, detailing the company's or product's carbon footprint, the measures taken to reduce carbon emissions, and the purchase of carbon credits to offset the remaining emissions.

WHAT WE CAN ASSIST:

In Peterson Projects & Solutions, we can assist your business on carbon emission certification scheme. Depends on your needs and where most of the emissions take place, our consultancy will comply with the standard of your choice. In addition, we can also help your business to prepare external recognition by agencies such as the Carbon Disclosure Project (CDP).

We can deliver our fisheries consultancy in many types of services, including:

1. Survey and mapping on your supply chain
2. Develop specific implementation of fisheries certification scheme through gap assessment on your current business
3. Provide in-house training on sustainable fisheries practice
4. Due Diligence assistance
5. Certification audit preparation and accompaniment
6. Post-audit corrective action assistance
7. Annual Monitoring and Internal Audit Assistance
8. Custom standard (develop you own company standard)

Our advice and supports are based on almost 100 years of experience and expertise in providing solutions to a broad range of customers including multinational companies, small and medium-sized enterprises, associations, non-governmental organizations, and governments.

We ensure you that your trust is well placed

 Carbon Footprinting	 Implementation	 Life Cycle Assessment	 Pest Control	 Responsible Sourcing	 Risk Analysis
 EcO ₂	 AMDAL UKL-UPL	 Due Diligences	 Water Footprinting	 Plastic Footprinting	 PROPER KLHK
