

ORGANIC, RESPONSIBLE, & SUSTAINABLE AGRICULTURE

The growing demand for organic products in the market represents a significant future opportunity for your business, requiring your adherence to acknowledged Organic Practices. Additionally, with the escalating environmental concerns, consumers and distributors increasingly seek companies that embrace sustainable practices. Organic Product Practices encompass a holistic system of farm management, food production, and labelling that integrates the best environmental practices, fosters high biodiversity, conserves natural resources, upholds superior animal welfare standards, and aligns with the preferences of particular consumers who favour products created using natural substances and processes. Embracing these practices can position your business for success in the ever-changing market landscape.

WHAT WE CAN ASSIST WITH:

At Peterson Projects and Solutions, we offer comprehensive assistance for your business preparing for Organic Product Practices. With our consultancy expertise in organic agriculture and commitment to sustainability and responsibility, we can provide specialized support for various agricultural products, including coffee, cocoa, tea, hazelnuts, palm, and more, covering both farming and processing aspects. Depending on your specific requirements, our organic and sustainable agriculture consultancy is designed to meet the standards set by several certification bodies, such as European Commission Organic Farming, USDA Organic, JAS Organics (Japanese Agricultural Standards Organics), MAFRA Organic Korea, Soil Association Organic Standards, GLOBAL GAP (Good Agricultural Practice), UTZ, Naturland Standards, Rainforest Alliance Standards, SNI Organik Indonesia, RSPO (Roundtable on Sustainable Palm Oil), and Round Table on Responsible Soy Standard (RTRS). Furthermore, we can also ensure compliance with Starbucks CAFE (Coffee and Farmer Equity) Practices and the GCP 4C Code of Conduct, which emphasize ethical coffee business practices.

We can offer you assistance in Organic scheme certifications consultancy, comprising:

1. Supply chain management
2. Developing a tailored implementation plan for Organic Product guidelines through gap assessment of your current business practices
3. Conducting field studies and research
4. Analyzing market outlook and trends
5. Creating a customized ICS/IMS (Internal Control System/Internal Management System) specific to your business
6. Providing in-house training on organic products
7. Assisting with due diligence processes
8. Preparing and accompanying your business for certification audits
9. Providing support for post-audit corrective actions
10. Assisting with annual monitoring and conducting internal audits for organic implementation
11. Tailoring custom standards to develop your company-specific guidelines for organic practices.
