

# Green Gold Label

## Why GGL?

METI in Japan approved GGL as PKS sustainability certificate as of 30th November, 2020 GGL Certificate is subject to CPO Mill (without plantation), Stockpile, Trading houses, and Power Plants, Around 200 Mills are in the commitment for the sustainability PKS sourcing

GGL has developed a set of requirements applicable to operators wishing to source, process and transport PKS into Japan as biomass input for energy production under the Japan's Feed in Tariff (FIT) system. The developed requirements want to provide a guarantee on: Legal Compliance (Outside Japan), Sustainable and legal sourcing, Fair working conditions, Elimination of child labor and Forced Labor, Workers' Rights to Organize and Bargain Collectively and finally information disclosure.

## Subjects taking GGL Certification:

All parties included in PKS transaction shall have GGL audit, verification and/or certification, for instance:

CPO Mill → Stockpile → Stockpile's sales company (if any) → Trader → Buyer → Power Plant.

## GGL Consultancy Process

- Apply for GGL to the company's Peterson Solutions.
- The Consultancy body makes contract and assist the overall procedure for the implementation and preparation for the certification
- GGL consultant makes on-site /remote consultancy
- GGL consultant makes a verification report to be used by the CB for their auditing and certification process.
- GGL consultant will also assist with training and resolution of the non-compliance as per GGL requirement.
